The Whole Life Nutrition Cookbook is a VERY well researched, informative work. The title says it's a cookbook but it's much more than just a cookbook. The first chapter opens with the following

Voltaire quote that I believe sets the tone for the book: "Everyone should be his own physician. We ought to assist and not force nature. Eat with moderation what agrees with your constitution. Nothing is good for the body but what we can digest. What medicine can produce digestion? Exercise. What will recruit strength? Sleep. What will alleviate incurable ills? Patience." If you believe in the what goes in, must come out philosophy, you will find something in this book to assist you in bettering your health! From the novice to the pro in the kitchen and garden, there's something for you here!If you've watched Doctor Oz, you've probably heard of the "blue zones" which are areas around the planet where people live the longest and with the greatest health. The recipes in this book are derived from the dietary patterns found in the "blue zones." There is an excellent selection of gluten-free, dairy-free, soy-free and egg-free dishes - something for everyone!Besides the over 300 recipes, there's so much other valuable-to-your-health information that it boggles the mind. You will find the six steps to nourish your digestion system. Whole Food sensitivity is thoroughly delved into. As a celiac, I can attest that food allergies and sensitivities are far more common than we might have imagined. The authors reveal ten common sensitivities, familiar conditions associated with a food sensitivity and known triggers, if any. Various dietary lifestyles such as paleo, vegan-ism, raw, Mediterranean and many more are explained and analyzed.
